

PMC Architecture • Dina Alexander

February 4 and 5, Saturday & Sunday 10 AM-4 PM (2 days/12 hours)

Early registration by January 20. Registration deadline: January 27.

Tuition: \$120 if received by January 20 . (\$130 if received between January 21 and 27).

Materials Fee \$15 (must be paid to the instructor the first day of class. This will include handouts and other items brought by the instructor.)

(Intermediate/advanced) This inspiring workshop will enable you to create metal clay forms in a more architectural way. Learn how to construct hollow beads without a burnable core. Using skills you learned in previous PMC classes, you will texture, emboss and embellish to create different shaped hollow beads. Time permitting; the goal is to learn how to make a lentil, a box bead, and a barrel bead. A good working knowledge of metal clay is required.

Students should bring at least two 28 g. packages of PMC+, tools, work surfaces, texture plates and rubber stamps, etc. - everything you will need to make your pieces. The instructor will have a limited supply of extra PMC+ available for purchase.
